

Plastic Grid Absorber (PGA)

Description :

Plastic Grid Absorber (PGA) is a 100x100x20mm plastic panel with 23 pieces come hole, injection molding from the Absorber Plastic Grain (APG). The application is to build a Dark Box for mobile phone inspection with the excellent electromagnetic absorption performance in the UHF band. It's also suitable for high building to prevent TV ghost and prevent radio communication disturbance like mobile phone.

RoHS 2.0
2011/65/EU

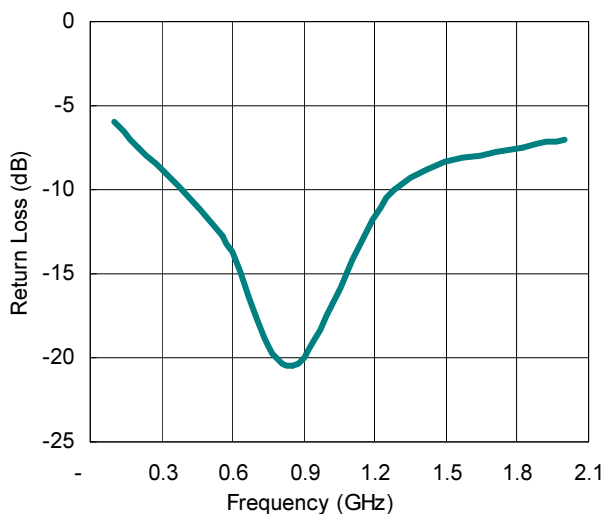

Features :

- Good absorption performance in UHF band
- Small size (100x100x20mm / 0.4Kg)
- Long service life
- Easy and fast to process

Applications :

- Dark Box for mobile phone inspection
- Prevent radio communication disturbance
- Prevent TV ghost

Reflective Attenuation - Frequency :
